

Tips Of The Week

Potential Sensitive Data was Found on the Document Message

Anytime a user enters a potentially sensitive data pattern (9-digit number) in the note or text fields on any e-doc, including but not limited to Vendor Create, REQ, PO, POA, or PREQ e-docs, a warning message is displayed. This message is intended to alert the user that if the 9-digit number would be considered potentially sensitive information (e.g., SSN or TIN number, or other number considered personally identifiable information), it should **NOT** be displayed in the e-doc. It is a warning only, and is left to the discretion of the user to determine the appropriateness of its display in the e-doc, and will not prohibit the user from proceeding further with document processing.
